To whom it may concern:

I understand that the White Mountain Aquatic Foundation plans to construct a multi-use, world class, aquatics center here in the Mount Washington Valley. As proposed, the facility will be funded through private sources and function as a private non-profit. It will include competition, therapeutic, and recreational pools and it would provide the community with a variety of programs including hydrotherapy, water safety education, competitive sports training as well as the enjoyment of recreational swimming. The center would serve residents of all ages and would attract visitors to competitive events and other regionally oriented programs.

Since there are no similar facilities within the region, an aquatic center would provide a unique and attractive amenity for our valley communities. The prospect of an aquatic center is exciting and I believe it would truly be an asset for residents and visitors alike

Sincerely,

Earl W. Sires
Town Manager, Conway
